

At East Dene Primary School, we are very excited to introduce our new strategy for improving children's mental maths skills; we are introducing East Dene's Maths Passports!

Each child (from Year 1 to Year 6) will be allocated a passport with a series of targets set out in continents. These targets get progressively more challenging as children move through school. The passports help track progression in basic number skills and will help your children develop instant recall skills in all these objectives. All passports are adapted to meet the individual needs of children, which will allow them to progress through the passports at their own pace. The aim is to complete all the passports by Year 6. They will practice these targets in class for 10-15 minutes every day; this will involve a combination of games and activities to improve their recall skills.

How can you help as a parent?

The most important thing for you to do is to talk and listen to your child about what they know about their Math's Passport Targets. Ask your child to show you something they have learned or are practicing in Maths that supports their target work. We would like you to spend a few minutes every evening practicing these targets with your child. This could be on the way home from school, at teatime or before bed!

How will they be rewarded?

When your child has shown they have achieved each skill on their Passport three times, they can move onto the next passport. They will receive a certificate in Celebration Assembly and this will also include their new targets.

Should you have any queries regarding the Passports, please do not hesitate to contact your child's class teacher or myself (Miss White.)
